## SUMMARY

Full Stack Software Engineer with expertise in JavaScript/TypeScript and React-based frameworks. Proven ability to build responsive mobile and web applications while enhancing platform performance and reducing debugging time. Experienced in designing secure, scalable solutions and collaborating with cross-functional teams to meet business objectives. Adept at translating complex requirements into efficient, maintainable code across the stack.

## EDUCATION

**Luzerne County Community College**  
*A.S., Computer Science*

**Jan 2025 - 2027**

**Coding Temple**  
*Certificate, Full Stack Development*

**Aug 2023 - 2023**

## EXPERIENCE

**Outlier AI (via G2i)**

**May 2025 - Present**

*Frontend-Focused AI Developer*

*Remote*

- Evaluated React Native and TypeScript code for accuracy, accessibility, and performance, ensuring high-quality applications that align with industry standards.
- Optimized prompt workflows to enhance AI-generated frontend code quality, reducing debugging time and errors by significantly boosting project efficiency.
- Collaborated with product and engineering teams to synchronize design and functionality across mobile and web platforms, achieving an improved user experience and a 15% reduction in development time.

**Cloud Cores**

**Jan 2025 - May 2025**

*Full Stack Engineer Intern*

*Remote*

- Developed cross-platform React Native components interfacing with Firebase backend services, reinforcing full stack development skills.
- Implemented secure login and data synchronization flows on Android and iOS platforms, ensuring robust and efficient server-side logic.
- Participated in Agile sprints and design reviews, contributing to cohesive UI/UX strategies and rapid iteration of features.

## PROJECTS

**Pretty Links - Software Engineer | Live Site: Pretty Links**

- Developed a responsive, WCAG-compliant bookmark manager using DOM APIs and semantic HTML.
- Prioritized ARIA labeling and keyboard navigation for accessible user experience across devices

**Bunny Bubble Nails - Software Engineer | Live Site: Bunny Bubble Nails**

- Built scalable, mobile-first interfaces with React Native and Tailwind CSS for both Android and iOS.
- Developed reusable components using TypeScript and styled-components to ensure modularity.
- Integrated Firebase Realtime DB and Auth for live updates and secure user management.
- Implemented payment functionality using Stripe APIs and React components.

## CORE SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3
- **Mobile Development:** React Native, Firebase, Expo, Tailwind CSS
- **Web & Back-End Frameworks:** React, Node.js, Flask (basic), Express, Postgres
- **Version Control & Tools:** Git, GitHub, VS Code, Jira (used via G2i)
- **Testing & Debugging:** Manual QA, Lighthouse, basic Jest (learning)
- **Deployment:** Firebase Hosting, Netlify
- **Practices:** Agile (Scrum), CI/CD pipelines, Component-Based Architecture, Accessibility (WCAG 2.1), Full Stack Development, Web Application Architecture
